Sustainability & Environmental Statement

TopCer has long been committed to environmental friendly operations in the conception, manufacturing and trading of Unglazed Porcelain wall and floor tiles. TopCer ensures sustainability along production processes in accordance with standards and legal requirements, and simultaneously making sure that we meet client's needs and expectations.

Environmental awareness is present throughout all TopCer products lifecycle (please see our [Environmental Product Declaration](http://www.topcer.com/general_data.php) at our website www.topcer.com/general_data.php) namely:

- Best practices adoption of environmental management for continuous improvement and pollution prevention;
- Assuring that all raw materials used in the production process come from environmental conscious suppliers, preferably from suppliers with environmental certification;
- Committing ourselves to reduce energy consumption in all stages of our product life cycle;
- Ensuring that the sludge from water waste treatment and crushed porcelain pieces generated in our manufacturing process are re-used by a licensed waste operator in the production of structural ceramics as these residues due to the technical characteristics of Unglazed Porcelain Tiles cannot be re-integrated in production process;
- Encouraging the recycling of other types of waste in the main areas where they are produced, by disposal bins with appropriate labeling, in order to support and perform the separation of several types of plastic, cardboard and paper, paper and plastic cups, wood, etc. Assuring that the recycling of each type of waste occurs through licensed organizations specialized in respective fields.

TopCer Environmental Management System is certified by ISO 14001 as well as TopCer Quality Management System by ISO 9001.

TopCer

Founded in 1991, TopCer is an established worldwide brand, well known by the quality of their unique and innovative products.

TopCer is specialised in the manufacturing of Unglazed Porcelain Tiles in small modular sizes (10x10, 7.5x15, 15x15, 10x30 and 30x30) in various textures and shapes, complemented by a considerable line of matching trim pieces (49), all available in 30 colours.

The continuous research of traditional sizes, components and patterns used in the last two centuries, led Topcer to develop the collections "Victorian Designs and Borders" and "Contemporaneous Series", which offer traditional and modern innovative designs, back mesh mounted in modular sheets. These made possible in some markets to develop specific niches for their use in Palaces, Museums, Hotels, Restaurants and Pubs, Cruise Ships, private homes, restoration of old floors, etc.

TopCer tiles, due to their high breaking strength, resistance to wear frost and non-slipping properties, are mostly used in all type of highly demanding areas.

Merit, Excellence and Leadership

● Means that we carry regular stocks. Orders are accepted for the minimum quantity of 1 carton.

○ Means that colour is not available in the above sizes/textures/thickness but can become available at request subjected to a minimum order quantity of 500m² [Customers must purchase any extra materials obtained in 1st quality for these customised orders, until the maximum of 10% of the ordered quantity].

If there is an enquiry for a small quantity of a specific colour/size/texture/thickness/shape that is not in the above list of regular stocks, please contact us to check if there is any material left from past productions.
